

**O**ur company is an importer and a wholesaler of electronics components and accessories since 1963

Established in 1963, **TELE-TUKKU** is one of the oldest and bestknown companies in its field in Finland.

**TELE-TUKKU**'s modern facilities are located in the Järvenpää about 37 kilometers from Helsinki, the capital of Finland and only fifteen minutes from the airport.

### **TELE-TUKKU means good service**

For all the customers that means a wide range of products in stock and quick and good deliveries. The quantity of stock items is 12 000.

The sales services consist of three main types.

The industrial sales persons serve their clients individually, making customer visits and calls. They also search components according customers specifications.

The catalogue sales gives the customers opportunity to order products listed in an easy-to-read catalogue, directly from the warehouse or for a requested delivery time.

Thirdly the retail and installation shops enjoy a full service with regular visits of the sales agents and maintenance of the customers selfserviceassortment. The products are delivered in selfservice packages (ready to be hooked) with retail price, bar code and product description.

TELE-TUKKU office and warehouse buildings in summer 2009

### **The most important product groups are passive and electromechanical components, power units, cables and connectors and tools and chemicals.**
