## Product Overview

The OMNI-404 is a wide band LTE/5G antenna with a smaller profile radome which is specifically designed for adverse marine & coastal environments. This antenna covers all contemporary LTE operating frequencies, from 698 to 3800 MHz, with excellently balanced gain across all frequencies, enhancing LTE performance features, such as multi carrier aggregation (CA). This antenna is also suitable on all 5G networks up to 3800 MHz. The antenna is designed for superior pattern control over the entire frequency range, making the OMNI-404 an exceptional omni-directional antenna for its size and application. Poynting Antennas achieves this through a new antenna design using multiple dipoles and a unique (patented) feed network. A standard 1-inch (14 TPI) marine mount connector is used for simplified installation to most standard marine attachments.

## Features

- Medium gain omni-directional antenna
- The antenna is purpose-built for marine and coastal applications
- Fits directly to standard 1-inch (14 TPI) marine mount
- UV and salt-water resistant
- Robust and weather resistant with IP 69K rating

## Application Areas

- Marine applications / Yachts / Boats / Ferries
- Enhanced LTE Reception
- IoT and M2M
- Poor data signal reception
- Improve data transmission connection reliability & stability

**Antenna Performance Plots**

**VSWR**

**GAIN: (excluding cable loss)**

**Voltage Standing Wave Ratio (VSWR)\***

VSWR is a measure of how efficiently radio-frequency power is transmitted from a power source, through a transmission line, into a load. In an ideal system, 100% of the energy is transmitted which corresponds to a VSWR of 1:1

The OMNI-404 delivers superior performance across all bands with a VSWR of <2.5:1

*\*Antenna VSWR measured with 2m low loss cable*

**Gain\* in dBi**

2 dBi is the peak gain across all bands from 698 – 3800 MHz

Gain @ 698-960MHz	-4 dBi
Gain @ 1710-2700MHz	2 dBi
Gain @ 3400-3800MHz	1.5 dBi

*\*Antenna gain measured with polarisation aligned standard antenna*
