

Modular Black Anodized Aluminum RAM® Tough-Track™

The modular black anodized aluminum RAM® Tough-Track™ can be drilled to any flat surface using #8 screws for easy installation—hardware not included. Made of rust-resistant materials, this is an excellent flat surface mounting solution for use in ATVs, cars, combines, motorboats, tractors, trucks, and more.

Available in lengths ranging from 3" to 17", the included top-loading end caps each add 1.5" in length. These end caps provide users with two installation options: use both top-loading end caps to create insertion points for bases on both ends of the track, or use just one top-loading end cap and close the opposite end with the included flush end cap.

Features:

- Made of black anodized, rust-resistant materials
- Snag-free inset hardware holes
- RAM® Mounts Compatible™ with RAM® T-bolt track bases
- Backed by a lifetime warranty
