## WE ARE "ANTEMNAE MAGISTER": THE MASTERS OF THE ANTENNA.

*Calereo Antenne is a company that was born together with a family: the one created by Alessio Calereo and Lucia Ciman, who, at the end of the 1950s, devoted their energies to lay the foundations of what is the industrial group we know today.*

*Since 1957 our goal and our core values have remained unaffected, we have maintained the same passion and the same energy that my parents have transmitted to us and that led Calereo Antenne until today.*

*"Execute our business using the most advanced technologies to produce the leading solutions in the field of connectivity, bearing in mind that there are people be-*

*hind this technology": this is the first value that my father chose for his company. This is the reason why our strength is in the team, a group made up of all the people who share our experience, our passion and our commitment. The beating heart of Calereo Antenne are those who work together every day and who recognize the success of the company as a common goal.*

*It has been more than sixty years since we first looked into the connectivity world. Since then, we have made signal transmission our flag. We have built our research centre, the brain of our group, which, thanks to the unceasing dialogue with several Italian and international*

*universities, guarantees us to be at the forefront of technology. We have grown in terms of numbers, experience and competence. Today we are proud to supply over 20 car manufacturers directly.*

*We are a family business with international vision. Our heart is in Italy and our gaze is always towards new horizons.*

*We want to be the leaders in the production of antennas and connectivity systems for cars, and we do it as ambassadors of Made in Italy in the world. We like to consider limits as opportunities, technological excellence as a starting point, and the constant effort towards technological evolution as a star to aim for.*

*Nevertheless, we have never forgotten where we started from, nor who accompanied us on our journey, all the people who have contributed to make our company great over the years.*

*The world moves rapidly and Calereo Antenne keeps up with it. We are ready to face all unexplored challenges, offering dedicated solutions to our partners globally, joining forces with them in developing new technologies in their specific field. We are "Antemnae Magister": the masters of the antennas.*

Massimo Calereo Ciman  
Chairman

## **CALEARO ANTENNE**

### **Vision**

*Magister Antemnae: being best in class in connectivity.  
Becoming excellence in your target market.*

### **Mission**

*Being a reference supplier, with profitability,  
of highly innovative solutions for market leaders  
and some niches in the world of connectivity*

## **RESEARCH, DEVELOPMENT AND INNOVATION**

Evolution plays a special role for Calearo Antenne. Research and development are both a commercial necessity and a constant investment: a look into the future, to remain at the forefront of technology and lead the sector.

Calearo Antenne has always boasted flexibility and the ability to react quickly to market demands, qualities that allow us to face the challenges that the globalized world raises today, and to anticipate those of tomorrow.

**All this is CE.R.CA:  
Calearo Research Center  
(Centro di Ricerca Calearo).**

The Calearo Research and Development Center, or Ce.R.Ca., is the fulcrum, the engine and the technological soul of Calearo, it is the "place" for the construction of competitiveness from which the leadership of the company and the continuous drive to the future, to innovation and experimentation.

Inaugurated in 2005, the Ce.R.Ca. today employs about 50 highly qualified researchers including PhDs, engineers, physicists and specialized technicians dedicated to research and development for all phases of product advancement, from design to production, working in synergy with national and foreign universities and research centres.

## CERTIFICATIONS

For Calearo, continuous improvement is a recurrent activity aimed to increase performance.

The path of defining objectives and identifying opportunities of improvement is a continuous process that apply the results and conclusions of the audit, data analysis, management review and other dedicated means. It generally involves corrective or preventive actions.

Performance is a measurable result that can refer to something qualitative or quantitative, being management activities, processes, products, services, system or organization.

Continuous improvement is nothing more than the process of becoming a more effective organization, an incremental path made up of many small steps towards a better professional future.

## CALEARO IN THE WORLD

Calearo Antenne defines itself as a “glocal” company, which operates in a globalized world, but draws energy from its roots deep in Italian ingenuity.

The choice that has always distinguished us is to be constantly in touch with our customers and their markets. For this reason, over the years, we strived to expand our commercial network all over the world.

To be present at the hotspots of global automotive manufacturing is a central point for us.

Technology evolves fast, and so do the increasingly peculiar demands of the market. Our factories in Italy, Slovakia and Tunisia and our logistic hubs in USA, India and China allow us to respond efficiently and effectively to all the market's needs.
